

I. Standardized prompt:

Create a one-page professional resume using the following details:

Name: Bea Kathleen P. Losaria
Email: bkplosaria@addu.edu.ph
Phone: 09294603030

Education:

Bachelor of Science in Architecture, Ateneo de Davao University, 3rd Year

Skills:

Computer-Aided Design (CAD), Adobe Photoshop, 3D Rendering and Visualization, Autodesk Revit, SketchUp, Architectural Drafting, Concept Development, Space Planning, Visual Presentation, Digital Illustration, Basic Graphic Design, Arts and Crafts, Painting, Photography

Projects/Experience:

No formal professional experience yet; completed multiple academic and design studio projects demonstrating strong architectural foundations. Worked both independently and collaboratively in team-based design environments. Designed residential and commercial building concepts with focus on functionality and spatial planning. Developed large-scale conceptual projects such as airport terminals, civic complexes, and cultural centers. Explored specialized projects including retreat centers/monasteries and mausoleums emphasizing form, atmosphere, and meaning. Produced hospitality and recreational designs such as hotels and stadiums. Engaged in mixed-use developments, community spaces, and institutional building concepts. Applied site analysis, zoning considerations, and user-centered design approaches. Created technical drawings, 3D models, and high-quality visual presentations using Autodesk Revit, SketchUp, and Adobe Photoshop. Strengthened skills in concept development, drafting, visualization, and design communication.

Format Requirements:

- Use a clean, modern, and minimalist resume layout
- Ensure strong visual hierarchy and balanced spacing
- Include clear section headings and consistent formatting
- Use concise bullet points with action verbs
- Keep the resume strictly one page
- Make it suitable for entry-level architecture or design roles
- Enhance professionalism through improved wording and structure
- Include a short professional summary at the top
- Add a "Portfolio" section placeholder for future design works

II. LLM Outputs

Output from ChatGPT:

BEA KATHLEEN P. LOSARIA

Email: bkplosaria@addu.edu.ph | Phone: 0929 460 3030

PROFESSIONAL SUMMARY

Architecture student (3rd Year) with strong foundations in architectural design, concept development, and digital visualization. Experienced in academic studio projects involving residential, commercial, and large-scale civic and institutional designs. Skilled in both independent and collaborative workflows, with a focus on functional planning, spatial quality, and conceptual clarity. Proficient in industry-standard design tools and passionate about developing thoughtful, context-driven architectural solutions.

EDUCATION

Bachelor of Science in Architecture
Ateneo de Davao University | 3rd Year (Ongoing)

TECHNICAL SKILLS

- Computer-Aided Design (CAD)
- Autodesk Revit
- SketchUp

- Adobe Photoshop
 - 3D Modeling & Visualization
 - Architectural Drafting
 - Concept Development
 - Space Planning
 - Visual Presentation & Diagramming
 - Digital Illustration
 - Basic Graphic Design
 - Arts & Crafts, Painting, Photography
-

PROJECT EXPERIENCE (ACADEMIC)

Architecture Student Designer | Academic Studio Projects

Ateneo de Davao University

- Developed residential and commercial building concepts emphasizing functionality, efficiency, and spatial organization
 - Designed large-scale proposals including airport terminals, civic complexes, cultural centers, hotels, and stadiums
 - Explored specialized typologies such as retreat centers, monasteries, and mausoleums focusing on atmosphere, symbolism, and spatial experience
 - Produced mixed-use developments, institutional buildings, and community-oriented spaces
 - Conducted site analysis, zoning evaluation, and user-centered design studies to inform design decisions
 - Created detailed architectural drawings, 3D models, and visual presentations using Revit, SketchUp, and Photoshop
 - Strengthened design communication, conceptual thinking, and technical drafting skills through iterative studio critiques
-

PORTFOLIO

- Available upon request / To be developed (Design works in progress)
-

Output from Gemini:

Bea Kathleen P. Losaria

Davao City, Philippines | 09294603030 | bkplosaria@addu.edu.ph

[Portfolio: bit.ly/your-portfolio-link]

PROFESSIONAL SUMMARY

Detail-oriented **3rd-year Architecture student** at Ateneo de Davao University with a strong foundation in spatial planning, conceptual development, and digital visualization. Proficient in Revit, SketchUp, and Adobe Creative Suite. Proven ability to translate complex design briefs—ranging from high-traffic civic hubs to intimate spiritual spaces—into functional and aesthetically compelling architectural solutions. Eager to apply technical drafting skills and creative problem-solving in a professional design environment.

EDUCATION

Bachelor of Science in Architecture | *3rd Year Undergraduate* **Ateneo de Davao University** | 2023 – Present

TECHNICAL SKILLS

Design & BIM: Autodesk Revit, AutoCAD, SketchUp, 3D Rendering & Visualization

Graphic Suite: Adobe Photoshop, Digital Illustration, Basic Graphic Design

Core Competencies: Architectural Drafting, Space Planning, Site Analysis, Zoning Compliance

Manual Arts: Painting, Photography, Arts & Crafts, Physical Model Making

DESIGN PROJECT EXPERIENCE

Academic Portfolio – Ateneo de Davao University

Civic & Large-Scale Infrastructure

- **Transportation Hubs:** Conceptualized modern airport terminal designs focusing on efficient passenger flow and structural innovation.
- **Civic Complexes:** Developed large-scale institutional and community centers integrating public accessibility with urban zoning requirements.
- **Sports & Hospitality:** Designed stadium concepts and hotel layouts prioritizing user experience, safety standards, and hospitality aesthetics.

Specialized & Cultural Spaces

- **Spiritual Architecture:** Explored form and atmosphere through the design of retreat centers and monasteries, emphasizing tranquility and meaning.
- **Memorial Design:** Conceptualized mausoleums focusing on symbolic architecture and emotive spatial planning.
- **Cultural Centers:** Created mixed-use and community-centric spaces aimed at preserving local identity through contemporary design.

Residential & Commercial Development

- **Mixed-Use Projects:** Integrated residential and commercial functions within high-density urban site constraints.
- **Concept Development:** Executed end-to-end design processes, from initial site analysis and schematic sketching to final 3D visualization.
- **Technical Documentation:** Produced comprehensive floor plans, elevations, and sections using Revit and CAD for diverse building types.

KEY STRENGTHS

- **Visual Communication:** Skilled in creating high-quality presentations that bridge the gap between technical data and visual storytelling.
- **Collaborative Mindset:** Experienced in working within team-based studio environments to meet rigorous project deadlines.
- **User-Centered Approach:** Dedicated to designing spaces that prioritize functionality, human scale, and environmental context.
- **Adaptability:** Fast learner capable of mastering new software and design methodologies to suit project needs.

III. Comparison Table

Criteria	LLM #1 (ChatGPT)	LLM #2 (Gemini)
Structure	Clean, simple, and well-organized into standard resume sections	More detailed with subsections and categorized project experience
Clarity	Very clear, concise, and easy to read	Clear but more verbose and slightly harder to quickly scan
Formatting	Minimalist, professional, and fits a one-page resume format well	More styled and portfolio-like, but risks exceeding one page
Overall Quality	Strong for formal resume use; practical and concise	Highly detailed and visually descriptive, but less concise

IV. Reflection

In this activity, I used two different Large Language Models, ChatGPT and Gemini, to generate a professional resume using the same prompt. After comparing the outputs, I observed differences in structure, clarity, and level of detail.

ChatGPT performed better in terms of simplicity, clarity, and organization. The resume it produced was clean, direct, and easy to read. It followed a clear format with proper sections such as Professional Summary, Education, Skills, and Experience. It also followed the instruction to keep the resume concise and suitable for a one-page format. As a result, the output felt more practical and appropriate for a professional resume.

On the other hand, Gemini produced a more detailed and descriptive resume. It included more explanations and breakdowns of architectural projects, such as civic, cultural, and residential categories. While this made the content richer, it was also longer and less concise, which made it harder to fit into a one-page format.

In my final resume, I combined the strengths of both outputs. I used the clear structure and conciseness from ChatGPT and added some of the more detailed project descriptions from Gemini. I also improved the wording to make it more professional and balanced while ensuring that the resume remained one page only.

Through this activity, I learned that prompt engineering is very important in shaping AI outputs. Small changes in instruction can greatly affect the result. I also learned that different LLMs produce different styles of responses, so it is important to compare and refine outputs to create a better final product.

V. Final Resume

BEA KATHLEEN P. LOSARIA

BS ARCHITECTURE STUDENT

 09294603030

 bkplosaria@addu.edu.ph

Education

Bachelor of Science in Architecture
3rd Year Undergraduate
